

Department:

Zeppelin Design Labs ~ Consumer electronics design / build / market / sell

Overview:

We are a small team of engineers, designers and craftspeople designing and making quality audio devices: amplifiers, microphones, synthesizers & accessories. We sell direct to the consumer through online marketing.

Person overseeing internship:

Glen van Alkemade, General Manager and Project Manager

Internship Opportunities:

An intern could be involved in any of the following, as skills & interest might indicate:

- Product development
 - Software design & development
 - Circuit design & testing
 - CAD modelling
 - Graphic design
- Web marketing through our various social media outlets
- Forum moderation
- Order fulfillment / customer service
- Light manufacturing / assembly / packaging
- Market research

Qualifications:

We will consider applicants currently enrolled in an educational program in any of these fields:

- Marketing
- Business Management
- Electrical Engineering
- Mechanical Engineering
- Computer Science or Computer Hardware Technology, etc

Even if you are not currently enrolled in school, we will gladly consider your application if you have experience and interest in any of the following:

- Guitar amps and / or effects pedals
- Music industry
- Recording technique and technology

You will work closely with our small team in our small shop on projects that match our needs with your interests and skills. This internship includes housing, board and transportation but no stipend.
